(a) The kicking function over the whole range ($T_J \leq 2 \times 10^4$ GeV)
QCD
notebook table, notebook interpolation
pipeline table, pipeline spline
$e^{\pm}$
EW
$\Sigma = 1 - 3w$
T_J [GeV]
(b) The electroweak scale, with the tabulated rows
rows differ
notebook table, notebook interpolation
pipeline table, pipeline spline
notebook table rows
pipeline table rows
notebook table ends: $w = 1/3$ imposed
at 386.7 GeV, $\Sigma = 0$ above
$\Sigma = 1 - 3w$
T_J [GeV]
