
(a) $T_J(N)$ with the pipeline's thermodynamics: notebook (colour) and pipeline (dashed)
T_J [GeV]
N
β = 2.9950
β = 3.0194
β = 3.0195
β = 3.0250
pipeline (all four)
(b) Notebook minus pipeline along the β = 3.015 history
$|\Delta \ln T_J|$
N
common Σ only (first report's runs)
notebook's thermodynamics in both
pipeline's thermodynamics in both
... with pipeline rtol 10^{-10}
pipeline rtol 10^{-8} vs 10^{-10}
(c) Largest difference over the whole history, every coupling (colours as in b)
max $|\Delta \ln T_J|$
β
